

# MUHAMMAD USMAN

## COMPUTER ENGINEER

### ABOUT ME

I am currently pursuing a degree in Computer Engineering from University of Engineering And Technology ,Taxila with a strong passion for web development and coding. I have hands-on experience in building responsive websites using HTML, CSS, and React, and I'm also exploring backend technologies. I enjoy problem-solving and constantly work on improving my skills through real-world projects. My goal is to become a skilled full-stack developer and contribute to impactful tech solutions.

### WORK EXPERIENCE

#### HEALTH MANAGMENT WEBSITE

I have created many front end websites like health facilities, for fitness purpose i have created also created GYM front end page its coding is in HTML and CSS and also i have used a little bbit java script in it. I have created many designing websites and these are very user friendly my after that my clients give me more orders to build like these type of user friendly websites clone.

#### FITNESS PURPOSE GYM CLONE

Developed a fully responsive gym website clone using HTML, CSS, and Tailwind CSS. The project includes multiple sections such as hero banner, services, pricing plans, testimonials, and contact form. Focused on clean UI, responsive design, and modern layout techniques for a real-world user experience. Demonstrated front-end development skills and attention to detail.

#### NETFLIX CLONE

Created a responsive Netflix clone using HTML, CSS replicating the core layout and design of the original platform. Implemented key sections like the navigation bar, hero banner, trending movie cards, and footer. Focused on modern UI/UX, responsive layout, and smooth user experience across devices. This project showcases my front-end development skills and attention to pixel-perfect design.
